ASAT®

Compact Power Ascender

ACE-51 is the new compact power ascender from ASAT which, for improved convenience, utilises Bosch Pro-Core batteries (not included as standard) which can be purchased in the user's local market. In addition, unlike other compact powered ascenders, the ACE51 can be used on a range of 11mm **and** 10.5mm EN1891A ropes which is a big advantage for the user as they are not being forced to buy a specific, premium priced rope.

ACE-51
Compact Power Ascender

- Remote control - good up to 100m
- Mid-line attachable
- IP54 rating – good for use in wet/rainy conditions and light dusty conditions
